Summary

Currently searching for a position as a JavaScript developer. I have completed a few Fullstack bootcamps so I'm comfortable working with either the front end or back end but making a full stack app would be preferred since I'd like to keep gaining experience with creating complete apps.

My last position was working as a quality assurance tester for Tata Consultancy Services. Mainly focused on manual testing but my responsibilities also included automating and running test cases with python and selenium. Experience working with document management such as ALM and Jira.

Experience working in a team with Agile methodology and some QA lead experience as well.

Experience

QA Tester

Tata Consultancy Services

Sep 2021 - Jun 2023 (1 year 10 months)

Daily tasks included mainly manual testing with little automation testing. Used Agile methodology for working on projects with team members.

Education

Universidad Tecnológica de México

Bachelor of Engineering - BE, Computer Software Engineering

Mar 2021 - Sep 2023

Universidad del Valle de México

Mechatronic Engineering, Mechatronics, Robotics, and Automation Engineering

80% completion of degree

Licenses & Certifications

Learn JavaScript Course - Codecademy

Learn CSS Course - Codecademy

Introduction to Networks - Cisco

Learn Java Course - Codecademy

Full Stack JavaScript - Bedu

Fullstack Coding Bootcamp - Tecnológico de Monterrey

Skills

Asset and Liability Management (ALM) • Jira • React.js • Express.js • MongoDB • Node.js • SQL
• Model-View-Controller (MVC) • Application Programming Interfaces (API) • JavaScript
